PROFESSIONAL EXPERIENCE

Full Stack Developer | Yours Efficiently Software Solution, Thousand Light, Tamil Nadu | *December 2025 – Present*

KJ Loyalty – Customer Loyalty Management System

- Loyalty Card/Code
  - – Assigned a unique loyalty card/code to each customer.
  - – Used the loyalty code to identify customers and manage their loyalty details.
- Reward Points
  - – Implemented a reward points system based on customer purchases.
  - – Enabled customers to accumulate and redeem points for rewards or monetary benefits.
- Referral System
  - – Implemented a customer referral system to attract new customers.
  - – Provided rewards to existing customers for successful referrals.
- Staff Access Management
  - – Implemented role-based access control for different staff members.
  - – Allowed administrators to control which features and customer data each staff member could access or manage.
- Customer Self-Service
  - – Enabled customers to check their loyalty details without logging in.
  - – Allowed customers to enter their loyalty code and view available reward points and related information.

StyleHub – Clothing E-commerce Website

- Developed a full-stack clothing e-commerce web application with React.js for the frontend and Node.js/Express.js for REST API development.
- Implemented JWT-based authentication and authorization with protected user and admin functionality.
- Designed and integrated a MySQL database for managing users, products, categories, orders, cart items, and customer information.
- Developed product browsing features including category filtering, product details, shopping cart, and checkout/order management.
- Implemented an admin dashboard for managing products, categories, users, and orders.
- Created responsive and user-friendly interfaces using Bootstrap, HTML, CSS, and JavaScript.
- Integrated frontend and backend using RESTful APIs and handled API responses, validation, and error

Technologies: React.js, Node.js, Express.js, MySQL, Bootstrap, JWT
